Buhler scope of supply

As part of our maintenance and replacement program, we can offer you the exchange of the roll cooling system as follows.

Our offer comprises the following services:

- Individual planning of conversion and supply of materials
- Removal of the old cooling unit
- Installation of the new roll cooling system
- Start-up of the reconditioned machine
- Extensive spare parts package for the new roll cooling system
- Six-month Buhler warranty on materials and workmanship

Your benefit:

- Fast exchange of components for preventive maintenance or in case of a defect
- High machine uptime through the application of genuine spare parts
- Constant roll temperature through the application of state-of-the-art technology
- Consideration given to modifications

Price upon request
