

Replacement Mechanical Seals FKK / FKX

Buhler
Customer Service
Grinding &
Dispersion

Take advantage of Buhler replacement components for preventive maintenance. We will supply you the reconditioned replacement mechanical seals on schedule. You plan the maintenance work in advance. The exchange can be performed by our service people or by your own maintenance staff. All replacement parts are reconditioned and tested at our factory and supplied to you ready to install.

Buhler scope of supply

As part of our maintenance and replacement program, we can offer you the exchange of the FKK / FKX mechanical seals as follows.

Our offer comprises the following services:

- Individual planning of exchange and ordering of materials
- Removal of the old mechanical seal
- Installation of the factory-overhauled replacement mechanical seal
- Start-up of the reconditioned machine
- Extensive spare parts package
- Six-month Buhler warranty on materials and workmanship

Your benefit:

- Fast exchange of components for preventive maintenance or in case of a defect
- High machine uptime through the application of genuine spare parts
- Consideration given to modifications
- Reduction of machine downtime
