

Polaris. The New Art of Milling.

MQRG

Perfect.

Innovative design.

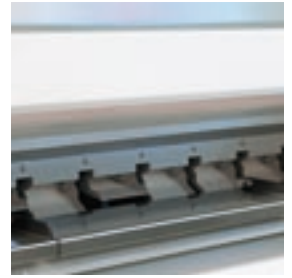

The new **Polaris** purifier blends perfectly with Buhler's product portfolio. It is the quintessence of "The New Art of Milling" and – with its ergonomic and functional design – stands for an uncompromising commitment to perfectionism.

Reliable.

Top process and product safety.

- Perfect
- Powerful
- Reliable
- Efficient

These typically Swiss attributes provided the basis in developing our new **Polaris** purifier. The **Polaris** purifier sets new standards in terms of process and product safety. The completely enclosed machine satisfies the most rigorous international hygiene standards (FDA, BRC, IFS, etc.). All parts in contact with the product are made of high quality materials to ensure top sanitation.

Efficient.

Low operating costs.

Efficiency was a top priority in the selection of the individual machine elements. The integrated, long-life LED lighting reduces energy consumption while providing optimal illumination of the screen. Low-maintenance vibration mounts combined with the maintenance-free, energy-saving drive reduce downtimes to the absolute minimum.

Powerful.

20% higher throughput.

The **Polaris** has transformed the dream of achieving 20% higher throughput with maximum separating efficiency and a minimized space requirement into a reality. **Polaris** – the successful symbiosis for every forward-looking milling industry.
